Reimbursement

Customers seeking reimbursement from Medicare, Medicaid, or any other federal or state program may be required to disclose on cost report forms any discount from Piramal Critical Care Inc.

I certify that I am a licensed practitioner eligible to receive the selected medications, as required under the Prescription Drug Marketing Act. I further certify that I am eligible to prescribe, request, and dispense the above listed medications in the state where I am licensed and that my collaborative agreement and/or formulary, if applicable, permit(s) me to do the same. I am also the responsible person for purchases made at the above mentioned address under my state license number. I will notify Piramal immediately if my responsibility status and/or relationship with this facility is changed or terminated. MKT-GAB-006-04-JAN-2018

Print and sign or type your name in field after verifying professional licensure at left.

SEE REVERSE SIDE FOR GABLOFEN BOXED WARNING.

IMPORTANT RISK INFORMATION

WARNING: DO NOT DISCONTINUE ABRUPTLY

Abrupt discontinuation of intrathecal baclofen, regardless of the cause, has resulted in sequelae that include high fever, altered mental status, exaggerated rebound spasticity, and muscle rigidity, that in rare cases has advanced to rhabdomyolysis, multiple organ-system failure and death.

Prevention of abrupt discontinuation of intrathecal baclofen requires careful attention to programming and monitoring of the infusion system, refill scheduling and procedures, and pump alarms. Patients and caregivers should be advised of the importance of keeping scheduled refill visits and should be educated on the early symptoms of baclofen withdrawal. Special attention should be given to patients at apparent risk (e.g., spinal cord injuries at T-6 or above, communication difficulties, history of withdrawal symptoms from oral or intrathecal baclofen). Consult the technical manual of the implantable infusion system for additional post-implant clinician and patient information.
